

Is Your Child Going To A Future Ahwatukee "Hot Zone" School?

HEALTH EXPERTS consider schools within 1/2 mile of the proposed 8-lane Ahwatukee truck by-pass to be a "hot zone" for air pollution and toxic chemicals. "Hot zones" have significantly higher concentrations of toxic truck emissions known to cause/compound a variety of ailments in children and older adults.

TRAFFIC EXPERTS predict up to **5,000 trucks** will pass by these schools **every day** - many carrying hazardous materials. Is your school prepared for a hazardous materials spill?
